

DISCOVER MICRO-GROOMING

Take your greens to the next level with the new Thatch-Away Micro-Groomers!

Micro-Grooming is the ultimate in sward refinement. The blades work in the upper leaf area of the surface to keep it lean and fast, with the finest possible texture. These cassettes build on the success of the existing Thatch-Away Groomer/Poa Busters, but take grooming to a wholly different level.

They are laser engineered with the finesse of a supercar, and have 210 blades per set, at just 6.5mm spacings, with ultra-fine 1mm tungsten tips. A staggering total of 2310 blade tips will groom your greens with a jaw-dropping 39,400 surgically precise micro-cuts per square metre!

If you are looking to invest in the very latest turf improvement technology, book a demonstration of the new ThatchAway Micro-Groomers. You won't be disappointed!

MICRO-GROOMER
