

FILL CORE HOLES FASTER USING LESS SAND

The Sweep-N-Fill Mk3 is the culmination of years of development work, to create the ultimate brush for dealing with heavy topdressings, and filling coring holes. Its two contra-rotating brushes are driven by the ground wheels, giving consistent brushing in relation to your speed of travel.

Its efficiency at filling coring holes enables significant savings in the amount of sand required to fill the holes and restore the playing surface. The brushes themselves float independently to follow the contours of your greens.

The electric lift ram, and height-adjustable tow hitch, enable it to be used with any power unit, from a utility vehicle to a greensmower or bunker rake, allowing you to use the lightest and most manoeuvrable power unit you have available.

Regular brushing with the Sweep-N-Fill lifts lateral shoots and promotes healthier turf. It removes grain and helps to maintain a fast, true, ball roll on putting surfaces, contributing to optimal playing conditions.

GreenTek®

Trusted by the best in the game

- Quickly brushes in heavy topdressings
- Fills core holes full in just a few passes
- Cleans turf surface of aerified greens amazingly fast
- Grooms greens and removes grain
- Lifts lateral growth before mowing

SWEEP-N-FILL

Sweep-N-Fill throws the sand upwards to fall straight down the holes

Core holes are filled full
